

DNA THETA HEALING BASIC SEMINAR

Course Overview

In this Basic Theta Healing Seminar, students will learn the fundamentals of Theta Healing.

Theta Healing was created by the esteemed Vianna Stibal, a visionary Medical Intuitive and Healer. DNA Theta Healing is about healing and creating a life that you want. You don't have to struggle with issues regarding your Health, Emotions, Love, Money, Work, Phobias, Depression, Abuse, Self Forgiveness, or Chronic Pain. DNA Theta Healing allows the practitioner to facilitate instant changes in a client's DNA on a cellular level by transforming the core of their beliefs.

These beliefs are held in four levels:

Core Beliefs

Are what you have learned from a child. It's what we usually learn from our parents. It's what we usually see a therapist for. It resides in our mental - emotional body.

Genetic Beliefs

Are carried over from our ancestors, usually 3 - 4 generations back. They are held in the morphogenic field and DNA.

Historic Beliefs

Are carried over from your past lives and the history of your race. They can also be carried as collective consciousness. These experiences are real. Where they come from is not the issue. It is vital to resolve the issues on the history level. Usually they are held in all the other levels.

Soul Level

Is who we are. What we are. Our souls are still learning and can be redirected. If a person holds programs on more than one level, the soul may be affected. For example grief and sorrow can be carried to the soul. Not only does this end up effecting a particular part of your body, e.g. Lungs. But you are making choices from that place of grief and sorrow, not from a healthy neutral place.
